DESK & TABLE CLEANING KIT

NEW!

CLEANS 4x FASTER THAN CONVENTIONAL METHOD

The H1N1 virus is very infectious. A higher hygiene than before is strongly recommended. Not only regular hand washing but also cleaning of touch points every day is very important. This autumn a big second wave of influenza is awaited.

Experts recommend the use of microfibre to prevent cross-contamination because it picks up and stores dirt, bacteria and germs, rather than sliding them around like other wipers can do.

Faced with budget cutbacks and custodial staff reductions, schools and other public places must do more with less. Unger has designed a Desk and Table Cleaning Kit that cleans 4x faster than spray bottles and rags.

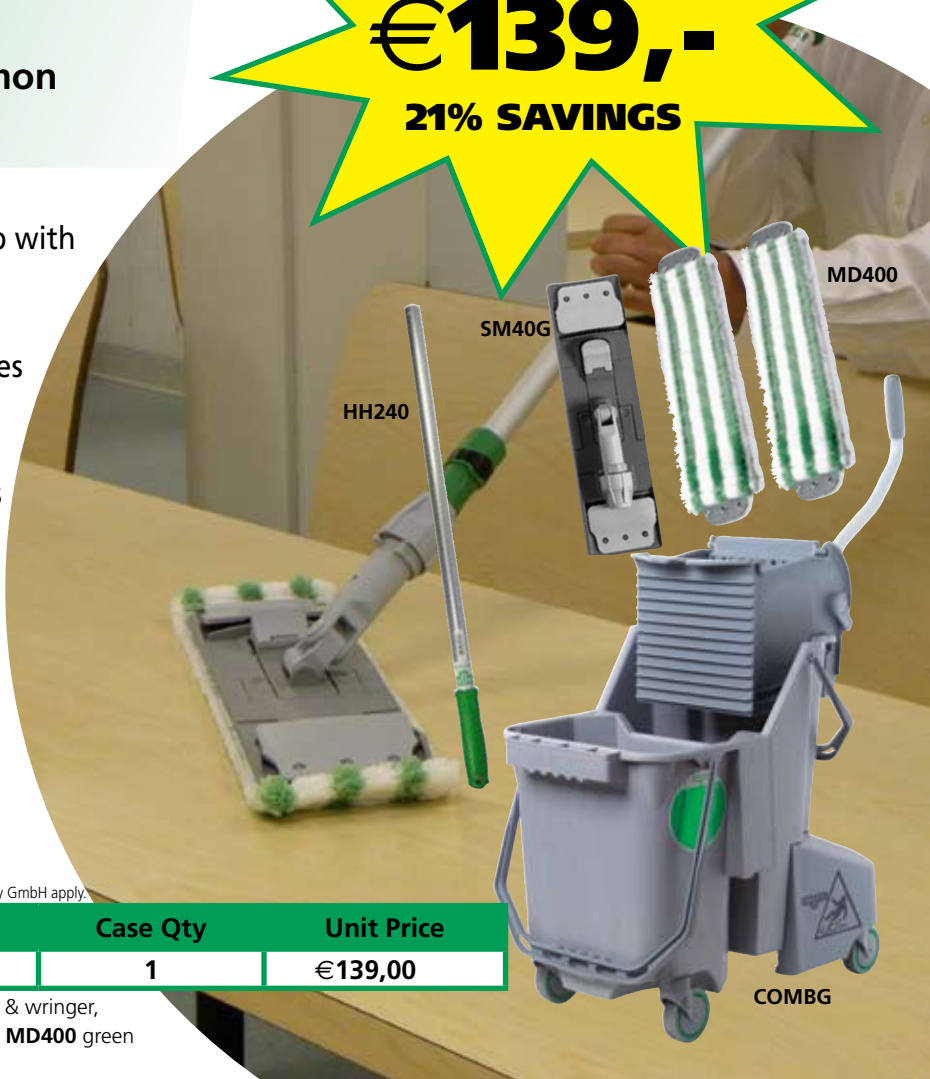

Unger's Desk and Table Cleaning Kit...

- will minimize the spread of infectious diseases by maintaining a clean surface on desk and table tops
- minimizes the risk from common touch points!

- ✓ **4x Faster Cleaning of Surfaces**
 - Ergonomic 40cm microfibre flat mop with handle covers more area faster
- ✓ **Effective Healthy Cleaning**
 - Unger microfibre technology removes 96% of surface bacteria with less chemicals
 - Dual-compartment bucket separates clean from dirty solution, ensuring the use of clean solution every time
 - Colour-coded green to prevent cross-contamination
- ✓ **Increased Cleaning Frequency**
 - The tools and process clean 4x faster enabling more desk and table cleanings per day

DESK & TABLE CLEANING KIT

Cleaning Process

✓ Cleaning Kit Assembly

- Assemble dual-compartment bucket per instructions provided
- Handle, mop holder and microfiber mop come pre-assembled and ready to use

✓ Step 1 - Fill Unger Dual Compartment Bucket

- Fill front of bucket with properly diluted sanitizer or disinfectant cleaning solution
- Fill rear compartment of bucket with one gallon of clean rinse water

✓ Step 2 - Prepare Mop For Cleaning

- Push button to collapse mop
- Dip mop into front compartment
- Wring mop well in rear compartment

✓ Step 3 - Clean Desk & Table Top

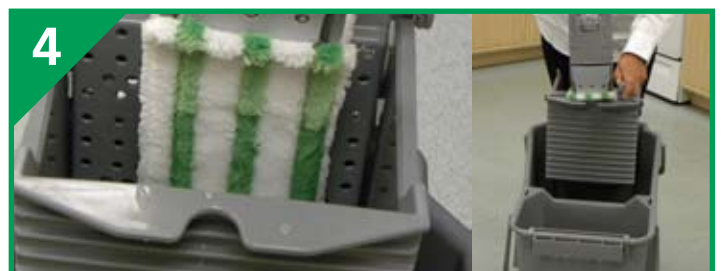

- Place mop on table and push down to lock in place
- Start on one side and move mop straight across the table to end. Turn mop and clean in opposite direction
- Continue to next table / Use only wet mop

✓ Step 4 - Rinse mop

- Collapse mop, lower through wringer and rinse in rear compartment
- Wring mop to release soiled rinse water
- Dip mop in front compartment, return mop to rear compartment and wring

✓ Step 5 - Continue cleaning

- Repeat steps 2 through 4 until all desks and tables have been cleaned
